PROFESSIONAL SUMMARY

Senior Mobile Engineer with 10 years of experience delivering mobile products used by millions. Strongest specialization in native Android with Kotlin, Jetpack Compose, Clean Architecture, and production reliability. Hands-on experience with React Native, Angular/Ionic, WebView integrations, PHP REST APIs with Moodle, and a Node.js ERP portal. Collaborates with international teams on architecture, releases, and mentoring.

CORE EXPERTISE

Native Android: Kotlin, Java, Android SDK, Jetpack Compose, Material 3, XML, Lifecycle, Navigation, WorkManager
Architecture & Data: Clean Architecture, MVVM/MVI, modularization, SOLID, Hilt/Dagger/Koin, Coroutines/Flow, RxJava, Room, DataStore, Retrofit/OkHttp, REST, GraphQL

Cross-Platform & Hybrid: React Native, Angular/Ionic, JavaScript/TypeScript, WebView, JavaScript bridges

Backend: Node.js, PHP, REST APIs, Moodle integration, expense and claims workflows, authentication

Quality & Delivery: JUnit, MockK, Mockito, Espresso, profiling, GitHub Actions, CI/CD, Firebase/Crashlytics, Sentry

PROFESSIONAL EXPERIENCE

Arbisoft Global - Principal Software Engineer | Mobile Engineering Aug 2017 - Present

- Led mobile architecture and delivery across EdTech, delivery, research, and kiosk products, partnering with product, design, backend, and QA teams.
- Modernized Java/XML codebases with Kotlin, Compose, multi-module Clean Architecture, repository abstractions, and dependency injection.
- Designed lifecycle-aware, thread-safe data flows with Coroutines/Flow, Room, Retrofit, and WorkManager for caching, synchronization, and recovery.
- Co-owned Open edX features including purchases, authentication, deep links, discussions, notifications, video/Chromecast, accessibility, and localization.
- Integrated WebView course content with native input handling, JavaScript injection, file uploads, HTML updates, notifications, and offline support.
- Contributed across Angular/Ionic and React Native apps, PHP/Moodle APIs, and Node.js ERP workflows.
- Sustained 99.2%+ crash-free sessions; reduced deployment time by 40% through CI/CD; mentored 4+ engineers.

Tecjaunt - Android Developer Aug 2016 - Aug 2017

- Built Java Android apps with REST APIs, persistence, authentication, and background processing; collaborated across teams through Play releases.

SELECTED PRODUCTS

Open edX Android | Kotlin, Compose, Coroutines, Room, Hilt

Modernized a global learning app; delivered learning, payments, media, hybrid content, and localization features.

Cheetay Delivery | Kotlin, MVVM, RxJava

Revamped Java-to-Kotlin architecture; delivered tracking and resilient payment workflows for 2M+ users.

CERP Survey & Sentimeter Kiosk | Room, Retrofit, AWS S3, Firebase

Built secure offline capture and synchronization for 500+ field agents; improved kiosk reliability and localization.

Schoolgram & Workstream | Angular, Ionic, React Native, PHP

Led Schoolgram development across Android/iOS; contributed React Native features and PHP REST APIs with Moodle.

Reimbursement Claims Portal | Node.js, ERP

Worked on backend workflows covering expense reimbursement, claims, and authentication.

OPEN SOURCE

Open edX Android Maintainer & Contributor - Review community contributions, guide architecture and quality, and support releases.

EDUCATION

BS Information Technology, University of the Punjab | Oct 2012 - Jul 2016
