PROFESSIONAL SUMMARY

Senior Mobile Engineer with 10 years delivering products used by millions. Specializes in Kotlin, Jetpack Compose, Clean Architecture, and production reliability, with React Native, Angular/Ionic, WebView, PHP/Moodle APIs, and Node.js experience. Uses AI-assisted workflows for implementation, review, and verification; collaborates with international teams on architecture, releases, and mentoring.

CORE EXPERTISE

Native Android: Kotlin, Java, Android SDK, Jetpack Compose, Material 3, XML, Lifecycle, Navigation, WorkManager
Architecture & Data: Clean Architecture, MVVM/MVI, modularization, SOLID, Hilt/Dagger/Koin, Coroutines/Flow, RxJava, Room, DataStore, Retrofit/OkHttp, REST, GraphQL
Cross-Platform & Hybrid: React Native, Angular/Ionic, JavaScript/TypeScript, WebView, JavaScript bridges
Backend: Node.js, PHP, REST APIs, Moodle integration, expense and claims workflows, authentication
Quality & Delivery: JUnit, MockK, Mockito, Espresso, Compose UI tests, GitHub Actions, CI/CD, Firebase/Crashlytics
AI & Workflow: Reusable agent skills, AI-assisted review/testing, Conventional Commits, PR workflows, API testing

PROFESSIONAL EXPERIENCE

Arbisoft Global - Principal Software Engineer | Mobile Engineering Aug 2017 - Present

- Led delivery across EdTech, logistics, research, and kiosk products; modernized Java/XML with Kotlin, Compose, multi-module Clean Architecture, and dependency injection.
- Designed lifecycle-aware, thread-safe data flows with Coroutines/Flow, Room, Retrofit, and WorkManager for caching, synchronization, and recovery.
- Co-owned Open edX purchases, authentication, deep links, discussions, notifications, video/Chromecast, accessibility, and localization; integrated offline WebView content, JS bridges, and file uploads.
- Contributed across Angular/Ionic and React Native apps, PHP/Moodle APIs, and Node.js ERP workflows.
- Sustained 99.2%+ crash-free sessions; reduced deployment time by 40% through CI/CD; mentored 4+ engineers.

Tecjaunt - Android Developer Aug 2016 - Aug 2017

- Built Java Android apps with REST APIs, persistence, authentication, and background processing; collaborated across teams through Play releases.

SELECTED PRODUCTS

Open edX Android | Kotlin, Compose, Coroutines, Room, Hilt
Modernized a global learning app; delivered learning, payments, media, hybrid content, and localization features.

Cheetay Delivery | Kotlin, MVVM, RxJava
Revamped Java-to-Kotlin architecture; delivered tracking and resilient payment workflows for 2M+ users.

CERP Survey & Sentimeter Kiosk | Room, Retrofit, AWS S3, Firebase
Delivered offline capture/sync for 500+ field agents, kiosk reliability, and localization.

Schoolgram, Workstream & Claims ERP | Ionic/Angular, React Native, PHP, Node.js
Cross-platform mobile delivery, PHP/Moodle REST APIs, and backend reimbursement/authentication workflows.

PERSONAL ENGINEERING PROJECT

AI-Assisted Mobile Engineering Playbook | github.com/omerhabib26/omerhabib
Built 7 reusable agent skills for feature planning, API contracts, implementation, review, testing, and telemetry-assisted debugging. Demonstrated Kotlin/Compose and Node.js reference implementations with architecture diagrams, Conventional Commits, PR templates, and GitHub Actions validation and delivery.

OPEN SOURCE

Open edX Android Maintainer & Contributor - Review community contributions, guide architecture and quality, and support releases.

EDUCATION

BS Information Technology, University of the Punjab | Oct 2012 - Jul 2016
